- Was able to refine my entrepreneurship spirit and flexibility by seeking mentorship from top 5 senior subordinates.

Projects

REACHOUT | Contact App | **MERN Stack**

[Live link](#) [Github](#)

- This is a simple, user-friendly site that has been created using MERN Stack which consists of 4 main technologies like **MongoDB** , **Express JS** , **React JS** , **Node JS** to implement **CRUD** operations.

- Requests like POST, GET, PUT, and DELETE carry out Create, Read, Update, and Delete operations.
- Other tools and technologies include Axios (a promise-based HTTP client for making **API** requests), Git (for version control systems), and CSS (along with 2 other tools) for styling and aligning components

Alpha Finance | Budget Calculator App | **JavaScript**

[Live link](#) [Github](#)

- An innovative app to track 3 main things, that is your incomes, expenses and savings, created using **JavaScript** to add functions that do the register, login, add incomes & expenses operations.
- Using **JSON**, mainly 2 data exchange purposes are met using the parse and stringify methods. Then localStorage is used for logname verification and sessionStorage for passing the key.
- **HTML, CSS** and **Bootstrap** are put to use to meet design requirements.

Online Medico | Online doctor Info App | **React JS , JSONServer**

[Live link](#) [Github](#)

- In this project, **JSON Server** is used for defining and storing data in a file named db.json using **API** requests made by Axios.
- And **React** is used for the front-end purpose along with **CSS** for adding styling to the pages.
- A functional and interactive form is added for customers to make their appointments.
